

P.023

Letter-Sound Correspondence

Medial Phoneme Spin

Objective

The student will match medial phonemes to graphemes.

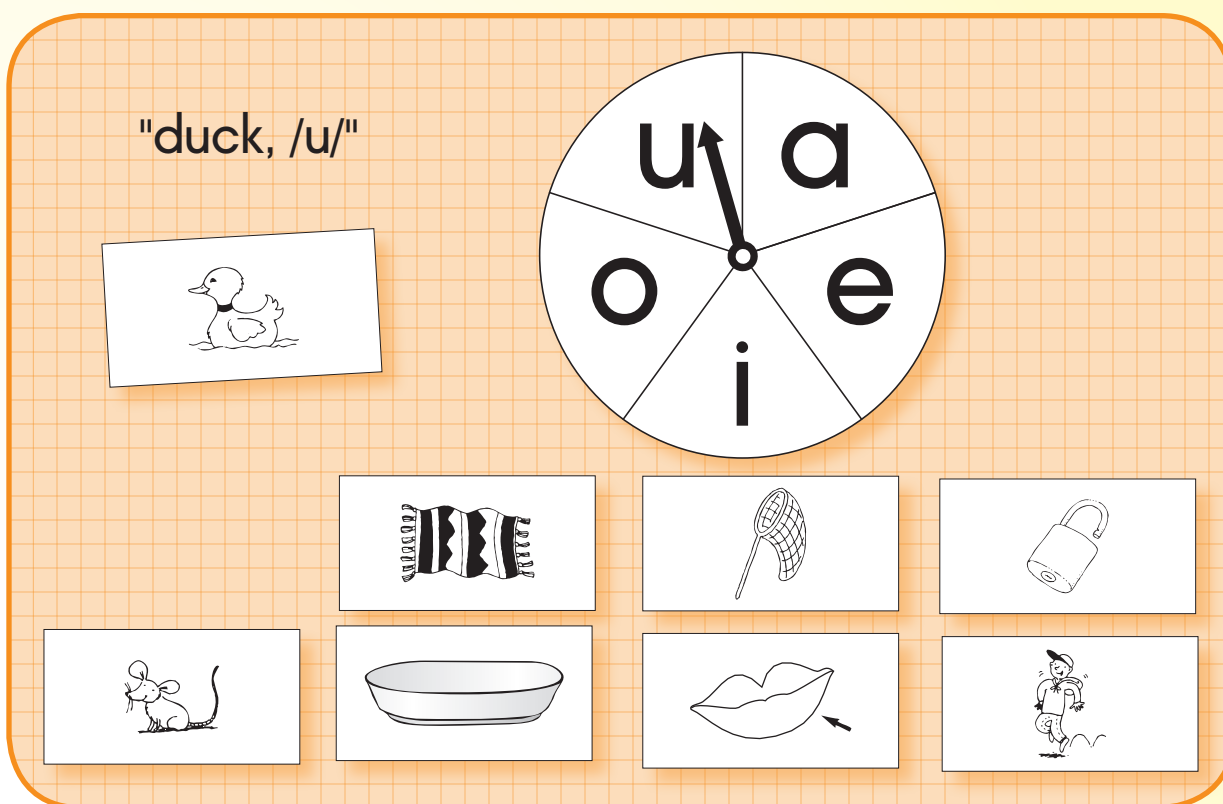

Materials

- ▶ Vowel spinner (Activity Master P.023.AM1)
Copy on card stock, laminate, and cut.
- ▶ Brad
Attach arrow to the spinner with the brad.
- ▶ Medial sound picture cards (Activity Master P.023.AM2a - P.023.AM2d)

Activity

Students match medial sounds of words to letters while playing a spinner game.

1. Place spinner at the center. Place picture cards face up in rows.
2. Taking turns, students spin the spinner, name the letter, and say its sound (e.g., “u, /u/”).
3. Select picture card that has the same medial sound, name it, and say its medial sound (e.g., “duck, /u/”). If correct, keep the card. If not correct, return card to its original position.
4. Continue until all cards are used.
5. Peer evaluation

The activity master features a central circular spinner divided into five segments labeled with the vowels 'u', 'a', 'e', 'i', and 'o'. An arrow is attached to the center of the spinner, pointing towards the 'u' segment. To the left of the spinner is a rectangular card with the text "duck, /u/" and a line drawing of a duck. Below the spinner are eight rectangular picture cards arranged in two rows of four. The top row contains a striped scarf, a fishing net, and a padlock. The bottom row contains a mouse, a bowl, a pair of lips with an arrow pointing to the medial sound, and a person carrying a basket.

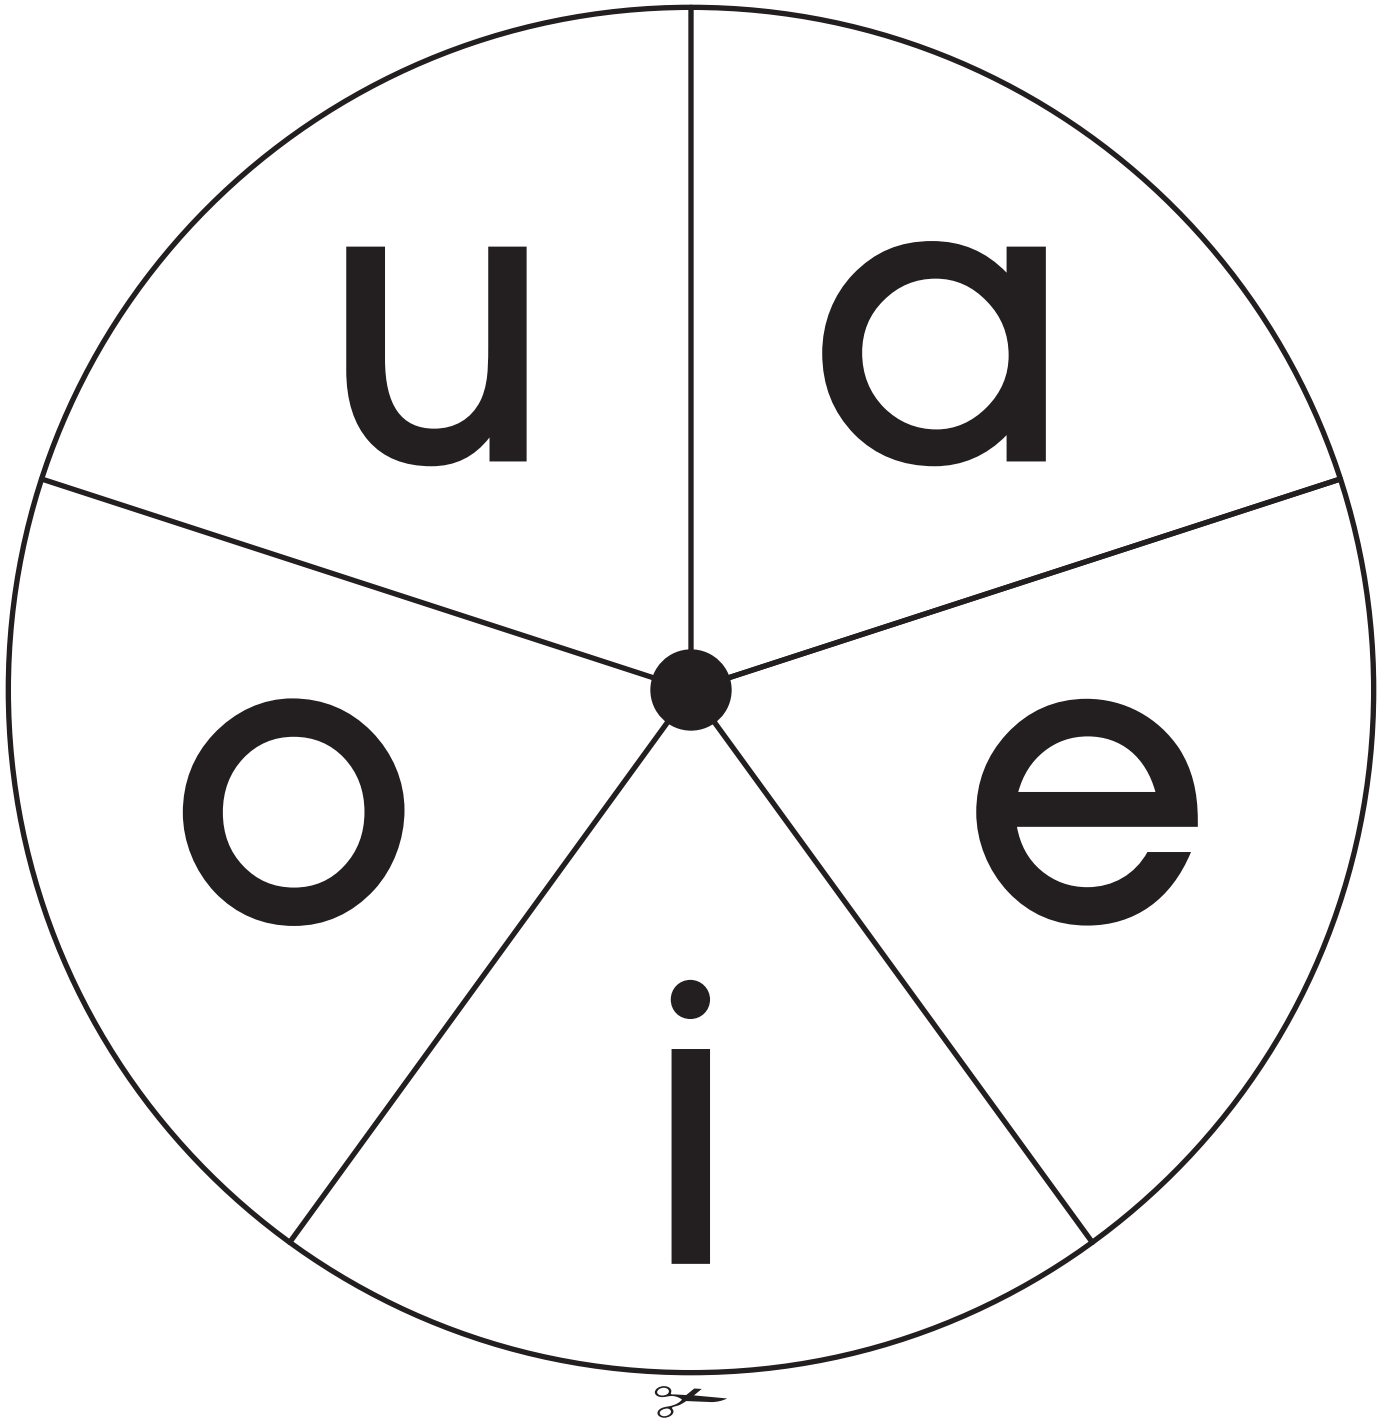

Extensions and Adaptations

- ▶ Make another spinner (Activity Master P.023.AM3) for use with initial or final sounds.
- ▶ Use long vowels as target letters.
